Hygienic, Water Resistant Keyboards & Mice Sealed, Washable, Immersible, Customized Medical & Industrial Keyboards The Cure for the Common Keyboard

Whether your challenge is dirt or durability, blood or bacteria, coffee or coughing, ErgonoFlex's liquid resistant, 100% latex-free, rugged, silicone base keyboards and mice are engineered to withstand environmental hazards in all workplace settings.

From the OR to the ER, the factory to the field, our contaminant-resistant, IP-68 rated keyboards and mice can not only withstand the harshest conditions, they can be disinfected, sprayed, wiped, sanitized and even submerged to dramatically reduce incidence of damage and contamination.

Distinguished by their rugged, ergonomic, sealed design, ErgonoFlex's keyboards and mice are ideal not only for industry, health care, food service and dentistry, but also enable silent, sanitary keyboarding in courtrooms, libraries, laboratories, pharmacies and schools — anywhere safety and durability are issues and employee, student, or patient health is a priority.

These medical keyboards can be used in nursing stations, OR's, in patient rooms, on hospital carts, in ICU's, laboratories or anywhere where infection control is a concern. The Cool line of keyboards and mice are available in a variety of sizes, functions and price points to meet the discerning user.

Yes, they're cool. But they're also tough enough to take a dousing in alcohol, 10% bleach solution, and other potent disinfectants. Not to mention soap and water. With a durable non-porous silicone rubber (latex free) construction, the disinfectable "Cool" products are built to withstand the kind of rigorous cleaning that would render other keyboards and mice useless. As a result, bacteria and viruses are kept at bay. The transfer of germs is minimized. Healthy environments become healthier.

Featuring an ergonomic thin design with full tactile feedback, these good-to-the-touch keyboards and mice are made to the highest standards and are easy to use and clean. Ideal for hospitals, laboratories, at nursing stations, on medical carts or anywhere cleanliness and reliability are of utmost concern, the "Cool" PC products provide relief to the high cost of patient infection and cross contamination. With this innovative line of infection resistant PC accessories, infection control is finally at your fingertips. Now, how cool is that? USB & PS/2 compatible
