Medical Station Combo INTOP 9, H Class, Height adjustable wall mount

The science of access to technology at the point of care everywhere

INTOP H CLASS is an exclusive combination of:

- * StS® lifting technology patented and easy to use by hand pedal
- * Quick, easy and extensive station customization
- * Easy assembly
- * 10x faster deployment than others
- * Unsurpassed value
- * Exclusive attention to the needs of health clinicians
- * Unlimited support for integrators, IT and clinicians

•Solid as rock and on the wall with the advantages:

1. Real ability to adjust the height from one seat to another:

StS® lifting technology offers 45.72 cm of effortless height adjustment using a hand lever.

2. Rock solid construction:

Professionally designed to withstand the rigorous demands of the health care environment

3. Compact design:

The independent height and depth adjustment of the monitor and keyboard saves space for all users, as they are less than 11.43 cm from the wall.

4. Easy to assembly:

Minimum installation required for economical installation.

5. Customization:

There are different needs for each health care environment.

That's why customization is the key. Let our professional sales and engineering teams help you customize your workstation.

* This wall-mounted workstation provides optimum technological access, thanks to effortless positioning of the monitor and keyboard to meet the ergonomic requirements of a seated or standing person. INTOP H Class restores the standard for workstations where space is reduced.

Technical characteristics:

- * 45.72 cm height adjustment from seat to shelf
- * 35.56 cm monitor adjustment (81.28 cm from total monitor height adjustment)
- * Monitor tilt +5°/- 15° * 180° monitor rotation * VESA 75mm/100mm
- * Depth Fold to 11.43 cm from the wall * 10.16 cm extension of the sliding keyboard support
- Monitor weight range: * Counterweight (2.26 Kg to 4.53 Kg)
- * Manual rotation lock (9,07 Kg)
- Maximum installation space required:
 - * Height: 203.20 cm x Width: 63.50 cm x Depth 35.56 cm (45.72 cm if the keyboard is stretched)
 - * Keyboard support dimensions: 22.86 x 63.50 cm foldable
 - * Work surface dimensions: 64,77 x 22,86 cm foldable * Total weight: 17.69 Kg
 - * Colour: Platinum and White

Display Compatibility: 26" Wide (Weight)

Anti-bacterial properties:

IT medical arms are now designed with Microban antibacterial protection, a revolutionary treatment that guarantees optimal hygiene. IT medical arms integrate Microban and other antibacterial agents into all medical products. It inhibits the growth of bacteria of all types. This is not a surface treatment.

It is 100% in the totality of the product.

It does not alter the physico-mechanical properties of the medical arm lift system. Simulations over 30 years show that 100% of the antibacterial properties are maintained.

All medical articulated arms incorporate Microban. Microban is the world's leading provider of anti-bacterial solutions. It has been successfully applied for more than 35 years in a wide range of products used in the hospital, construction and food industries.

UC Holder for Medical Arm
 Combo H Class WT Wall
 Mount
 Part Number: 112.001

Please call our customer
 service to verify
 compatibility with the
 station you have selected.

UC Holder for Medical Arm Combo H Class WT Wall Mount

* This central unit holder is mounted on the wall rail of the H Class WT series of medical arms.

Technical specifications:

- * Depth adjustment from 3.17 to 10.16 cm
- * Height 18.41 cm
- * Width 25.40 cm
- * Has 2 depth adjustment knobs to securely and properly attach the computer.
- * Color White

Microban is the world's leading provider of anti-bacterial solutions. It has been successfully applied for more than 35 years in a wide range of products used in the hospital, construction and food industries.

Medical stations INTOP H Class Medical Grade

Innovative designs, a patented StS ® elevator technology that allows INTOP H Class computer stations to elevate height without effort is unmatched in the industry.

This StS ® technology offers smooth adjustment flexibility regardless of the size and strength of the user, allowing him to maximize his comfort of use both sitting and standing. The revolutionary design of StS technology separates from conventional technologies such as conventional gas spring, pulley, traditional spring and electrical system, generally used in this type of design.

A StS elevator technology that is not under pressure, which means that your long-term performance will remain higher.

A space of 45.72 cm height adjustment, allows a comfortable view of your laptop or your screen.

Designed for prolonged sitting or permanent applications. STS technology offers a true revolution in ergonomic design that can be used by a wide range of clinicians and caregivers of all sizes, allowing them to adjust the height of the worktop from 73.66 cm to 119.38 cm.

A rugged anodized aluminum construction, complemented by a small footprint, allows the INTOP H Class IT medical stations accessibility even in places where space is reduced.

These mobile medical computer workstations contribute to the encoding of critical patient care information with comfort at the patient's bedside with unmatched travel comfort.

The INTOP medical computer stations comply with the standards of hospital hygiene, effectively they contain less than 5% of plastic harmful to bacteria and can be disinfected in the smallest details, including wheels.

An anti-bacterial coating (microban) ensures perfect hygiene of the work surfaces and are therefore impervious to bacteria, no asperities in their designs for a complete cleaning, fast and easy, helping to control infections.

It takes only 10 minutes to completely disinfect the workstation.

Human-centric designs place mobile computing exactly where it needs to be, reducing the time spent on each task for more efficiency.

Specifically designed for the medical sector, these medical computer trolleys are the result of a close collaboration with nurses, computer scientists, doctors, offering them unparalleled comfort and ergonomics in data entry.

These desktop computing solutions therefore provide healthy computing environments that promote work efficiency.

INTOP H Class medical stations are 95 percent recyclable. This means that the complete product is 95 percent recyclable. Our company encourages other manufacturers to recycle their product using as little plastic as possible.

Developed for superior performance, quality, durability for a better return on investment. Designed and created to minimize the impact of energy consumption and thereby reduce the harmful effects of air emissions and pollution.

Backed by a 5 year warranty, our mobile solutions will give you all satisfactions.

INTOP H Class Medical Stations Bacteria Impermeable

Plastic, even food, is porous. This porosity, accentuated by scratches can cause bacteria nests in computerized medical arms during these constant manipulations. A biofilm can be put in place in a few hours, and allow the bacteria there to become resistant to external agents.

This is why our Computer Medical Arms, contrary to what we find on the market have a complete structure in anodized aluminum. Less than 5% of plastic in their designs dedicated specifically to the medical and hospital sector.

Aluminum, its characteristics, its properties, its utility:

Main characteristics

Density: 2700 kg / m³

Density: 2.7 (three times less than steel)

The use of aluminum is therefore essential in the areas of the construction of our computer arms.

Corrosion resistance:

Aluminum alloys are highly oxidizable. In the air, a layer of a few micrometers of aluminum oxide (Al₂O₃) is formed. Thanks to this thin film, aluminum alloys become resistant to corrosion. Unlike most metals, aluminum needs to oxidize to be used. Without this film of oxide, it would be unsuitable for most of its applications.

Thus, under normal atmospheric conditions, exterior building claddings or aluminum alloy parts have minimal maintenance and extended service life.

Anodizing:

Forced oxidation with an electrolyte makes it possible to obtain coloring of the parts. This anodizing can also be colorless to keep the shine of the pieces (aluminum color). The protective oxide layer can be made thicker by anodization.

Recycling:

To recycle aluminum, there is nothing simpler: just melt it. In addition to environmental benefits, aluminum recycling is much less expensive than extraction from bauxite ore. It requires 95% less energy. And a ton of recycled aluminum saves four tons of bauxite. By skipping the electrolysis stage, which requires a lot of energy, we avoid the pollutant emissions associated with it. Aluminum is almost infinitely recyclable without losing its qualities. In France, aluminum is recovered as part of selective sorting. In sorting centers, it is sorted thanks to eddy currents. It is then broken and crushed and melted. The downside, aluminum remains on the market an expensive material.

Bénéfice:

Benefit:

- * Resistant to corrosion
- * Unalterable color
- * Rigid
- * Allows 100% recycling
- * Light
- * Noise and vibration reduction
- * Do not rust
- * Longevity is three to four times greater than steel
- * Absorbs considerable pressure and effort
- * Insulation
- * Effective barrier against bacteria
- * Raincoat
- * Resistant to high and low temperatures
- * Sterilizable
- * Strength, weight, versatility
- * Do not burn
- * Anti acid

Antibacterial Micoban:

The medical computer arms are now designed with Microban antibacterial protection, a revolutionary treatment that guarantees optimal hygiene. Medical computer arms integrate Microban and other anti-bacterial agents into all medical products. It inhibits the growth of bacteria of all types. It is not a superficial treatment. It is 100% in the entire product. It does not entail any alteration of the physico-mechanical properties of the lift system of the medical arms. 30-year simulations show that 100% of anti-bacterial properties are maintained. All medical articulated arms incorporate Microban. Microban is a world leader in anti-bacterial solutions. It has been successfully applied for more than 35 years in multiple products used in the hospital, construction and food sectors.

Medical Stations INTOP H Class Technology Elevator

Innovative designs, a patented StS ® elevator technology that allows computer stations to elevate height without effort is unmatched in the industry.

This StS ® technology offers smooth adjustment flexibility regardless of the size and strength of the user, allowing him to maximize his comfort of use both sitting and standing. The revolutionary design of StS technology separates from conventional technologies such as conventional gas spring, pulley, traditional spring and electrical system, generally used in this type of design.

A StS elevator technology that is not under pressure, which means that your long-term performance will remain higher.

A space of 45.72 cm height adjustment, allows a comfortable view of your laptop or your screen. Designed for prolonged sitting or permanent applications. StS technology offers a true revolution in ergonomic design that can be used by a wide range of clinicians and caregivers of all sizes, allowing them to adjust the height of the worktop from 73.66 cm to 119.38 cm.

Mobile Technology "The Difference"

Access to technology anytime and anywhere, work safely within different healthcare environments, and increase productivity are some of the ways we make a difference in mobile computing. Here are some other ways and you'll see why these computer medical carts stand out in today's health care market.

Easy mobility:

A super light weight less than 15.45 Kg depending on the chosen station

Ability to adapt the height:

StS ® lift lift technology that features 45.72 cm of effortless height adjustment. Adjusting the height range with hand pedal.

Small footprint:

A small footprint on only 12 cm

Comes fully assembled:

Delivered fully assembled: Save time and money for you.

Color choice:

Optional multiple choice colors.

Customization:

There are different needs for each health care environment. That's why personalization is the key. Let our professionals and the engineering team help you customize your INTOP station.

Sustainable design:

Safe products that will help you move towards a healthy work environment. Our INTOP medical stations H Class adjustable in height are 95 percent recyclable.

Medical Stations INTOP H Class Disinfection, cleaning and hygiene

Nosocomial infections are a real public health problem. There are nowadays in France, about 10,000 deaths per year of these infections contracted at the hospital. They represent a very heavy burden for society, from a human, economic and social point of view. As a result, medical computer trolleys have been designed to be disinfected in their totality and disinfection takes only a very short time for the hygienist (less than 10 minutes).

WHY KEEP THE SAFE SURFACES?

- * Pathogenic microorganisms that enter the premises can survive on surfaces for long periods of time.
- * Microorganisms that settle on surfaces can then be transmitted to the hands.
- * The germs of the hands can spread by contact, and be transmitted to other people and cause an infection.
- * Clean or disinfect surfaces to reduce the risk of cross-contamination.
- * Clean water may become contaminated if its container is not clean.

Recommended disinfectants:

1. Chlorine-based (10% max solution) - Chlorox, Novalsan, etc.
2. Formaldehyde base - 37% formaldehyde solution, Vinco Formaldegen, etc.
3. Glutaraldehyde-based stock - Aldacide 200, Lysofume, Wavicide, etc.
4. Phenol stock base - Lysol IC, many, Magna Clean, Tek-Trol, etc.
5. Alcohol Based - CaviCide, Isopropyl Alcohol, Medicide (POL-0.3), etc.
6. Oxidants - Hydrogen Peroxide Solution 3%, VikronS, Lifegard series, etc.
7. Ammonium quaternaries - Roccal-D, Bacto-Sep, Ascend, Parvosol, etc.
8. Soap and hot water

DO NOT USE:

1. Oil-based liquid cleaners, such as gasoline, turpentine or petroleum
2. Acetone
3. More than 10% bleach solutions
4. Temperature or sterilization pressure

The ergonomics of our medical computer stations INTOP H Class and you

Reduce the fatigue of clinicians and offer them better comfort in the workplace.

A comfortable position when working with a computer is very important. That's why the products we distribute help you against musculoskeletal discomfort and help achieve a comfortable working position.

"INTOP H CLASS" wall workstations adapt to your workflow and environment.

Whether you are sitting or standing, "INTOP H CLASS" is the highly ergonomic solution that promotes well-being.

• Adjusting the seat height to support

Patented, easy-to-use lifting technology The StS® lifting technology offers a true range of seat height adjustment (45.72 cm).

• Height adjustment of the medical station

Accommodations of all levels. With multiple users, there are several height ranges. A simple fit fits a wide range of heights including 5% adult women and 95% men.

• Ultra strong construction

Professionally designed. To maintain your position comfortably (no rebound on the keyboard platform) our very robust construction allows for a healthy posture both sitting and standing. The entrance is designed to withstand the rigorous requirements of the health environment.

• Compact design / space saving

Storage at your fingertips. With one setting, "INTOP H CLASS" gives the user a space-saving storage experience. "INTOP H CLASS" can be stored 11.43 cm from the wall.

Stations Médicales INTOP H Class Ergonomie

A - The height adjustment must have a minimum curvature up to the wrist, 45.72 cm Seat-to-press height adjustment encourages correct alignment of the wrist and elbow.

B - The top third of the computer screen must be at below the level of the eyes. Height adjustment of the monitor (35.56 cm) Observation height.

C - + 5 ° à -15 °.

Tilting the computer screen reduces visual discomfort and posture.

D 180 ° rotation of the computer screen.

Whether landscape or portrait, the desired focal preference is achieved.

Medical Stations Combo INTOP H Class Height Adjustable Wall Mount

We have all the solutions and offer you the widest choice of professional medical media systems compatible with the widest possible range of medical and computer monitors.
